Observation on PL21/236

I am concerned of the impact of deepening the quarry will increase drawdown....and has potential impact on surface water areas such areas as Aughamore Stream and Lough Gill, private wells, ground water flooding. I am very concerned with regards to the impact on quality drinking in the areas supplied from this lake.

I would also like highlighted the people of Sligo and worldwide regards and devotion to Tobernalt Holy Well and my concern that any such blasting activity might in any way interfere with this place of devotion going back centuries.

I also wish highlighted the Special Area of Conservation under the European Directives and its protecting of Lough Gill, Cummen Strand, and Ballisodare Bay.

Yours Sincerely.

Gerard Mullaney.
