Subject: Revised submission for PA 21236

To whom it concerns.

I wish to make an observation on planning application number 21236.

In relation to the water being pumped from the quarry floor, the applicant should be obliged to provide water quality data to show that there is no risk to the stream they are discharging to and the water quality of the lake and subsequently of the drinking water supply for Sligo. In my view the proposed works would adversely affect the Lough Gill SACs and other nearby protected sites.

Yours sincerely,

Cllr Marie Casserly
Sligo Co Co.
